ANSMANN POWERLINE 8 UK

The ANSMANN POWERLINE 8 is a compact charging station designed for charging AAA and AA NiMH or NiCd rechargeable batteries. This desktop charger is able to simultaneously charge from 1-8 AA or AAA rechargeable batteries and has a 1A USB outlet socket on the side.

There are dual coloured LEDs on the charger to show the charging status for each slot. A solid red LED would indicate charging, green LED would indicate fully charged and flashing red LED would indicate a faulty battery. This great little charger also offers a discharge function to help refresh older batteries. Simply put the batteries in the charger, press the discharge button and the charger will automatically discharge the batteries to roughly 0.9V per battery and then charge them to fully charged. Whilst discharging the LEDs will flash red and green.

The microprocessor controlled charger has supervision of each position with over charging protection per battery, auto cut-off function, trickle charging, reverse polarity protection, alkaline and faulty cell detection.

To power the charger a 100-240V AC power supply is included with interchangeable plug system for use in the UK and Europe.

INFORMATION

Product name	Powerline 8 UK	Product	172 x 52 x 252 mm
Part No.	1001-0006-UK	Product + Packing	240 x 195 x 285 mm
EAN-code	4013674019403		
Customs tariff number	85044055		
Product content	Powerline 8, power Supply, UK/EU plugs, instructions
