**Product Description:**  
**Part Number:**  
**EAN Code:**  
**Package Size:**

**Energy 16 plus UK**  
**1001-0004-UK**  
**4013674011025**  
**4 Pcs**

### Product Features:

Battery charging and maintenance unit for 1 - 12 AAA or AA cells, 1 - 6 C or D cells and 1 - 2 9V Blocks. This charger is suitable for NiCd and NiMH rechargeable batteries. The unit also has 2 USB charging sockets.

The charging currents are: 1000mA for AA, C and D cells, 400mA for AAA cells, 60mA for 9V Blocks and 1000mA for the USB charging sockets.

There is a capacity test of the inserted cells for approximately 10 seconds, an automatic diagnosis of the inserted cells with an automatic start of the refreshing process and/or pre-charging process, if required, tired cells will be activated.

The Energy 16 plus has microprocessor controlled charging, multiple over charging protection, battery full detection, individual supervision of each cell position, faulty cell detection, alkaline battery detection and automatic switch to trickle charge. The charger is powered by a switch mode power supply which means it can be used worldwide (100-240V wide range input).

ANSMANN gives a guarantee of 3 years for the Energy 16 plus charger.
