## ANSMANN PC III

The ANSMANN PC range of battery chargers offer intelligent microprocessor controlled charging in a compact design. They offer outstanding value and the PC III comes with or without batteries (you decide which type and capacity you need). This range is suitable for charging NiMH or NiCd batteries.

### FEATURES:

- Intelligent, microprocessor controlled with automatic sensing for charge end (-DV)
- Faulty battery detection, overcharge protection, safety timer and trickle charge
- PCIII comes with a variety of battery capacities, from AAA 550mAh to AA 2850mAh (AA2850mAh shown here)
- PC III has a coloured LED to show when the batteries are charging/charged or faulty
- Charges 2-4 AAA or AA rechargeable batteries
- Plugtop design for compact charging

## INFORMATION

- Part No.: 5007093-UK
- EAN code: 4013674028641
- Input voltage: 100-240V AC 50-60Hz
- Charges 2-4 AAA or AA
- Charging current: AA and AAA: 500mA
- Batteries included: 4 x AA 2850mAh
