Product Name:	PC V
Part Number:	5207473-UK
EAN Code:	4013674005628
Package Size:	4 Pcs

Product Description:

The ANSMANN Photocam V is an intelligent charger for charging 1-4 NiMH or NiCd rechargeable cells of AA, AAA, C and D sizes and also one 9V block.

Features of the charger include:

- A fast, intelligent charger with the following charging currents:
800mA for 1-2 AA, C or D; 400mA for 3-4 AA, C or D
400mA for 1-2 AAA; 200mA for 3-4 AAA
15mA for 1 9V block (not intelligent charging).
- Capacity quick test for approximately 5 seconds after the insertion of the cells.
- Microprocessor controller monitoring each set of cells inserted and individual charging of each cell position.
- Faulty cell detection for when a cell is inserted incorrectly and also if you have accidentally inserted an alkaline battery.
- Delta Peak detection to ensure the batteries does not get overcharged.
- Charge status indicator via LED for Fast and Trickle Charge.
- Suitable for NiMH or NiCd batteries.
- Available for worldwide use due to the 100-240V AC power supply.

ANSMANN offers a 3 year warranty on this product.
