#### Relationship between Discharge Current and Discharge Capacity

- Nominal capacity indicates duration until the voltage drops down to 2.0V when discharged at a nominal discharge current at 20 deg. C.
- When using these batteries at temperatures outside the range of 0 to +40 deg. C, please consult Maxell in advance for conditions of use.
- Dimensions and weight are for the battery itself, but may vary depending on terminal specifications and other factors.
  - Data and dimensions are not guaranteed. For further details, please contact us at your nearest Maxell office.
